

RPlan Portfoliomanager – Helping you hit the target

RPlan Portfolio- manager

A sound start is crucial to the success of any project. But which of your ideas holds the greatest promise of success? And are you on the right track with your project?

RPlan Portfolio Manager is the answer to all your questions. It delivers all the information you need on opportunities and risks, and on the course of your projects and ideas.

Making well-founded decisions

RPlan Portfolio Manager is an ideal information platform from which to assess your projects. From the smallest of beginnings through to the successful conclusion of your projects, you always have a clear overview of the information on which to your forecasts, decisions, and implementation options are based.

Translating ideas into projects

Promising projects are often born of spontaneous ideas. RPlan Portfolio Manager has Internet capability so that you can capture your ideas regardless of time and place. Its sophisticated software features a wide range of criteria so that you can classify information according, for example, to technical, strategic or economic aspects.

You can filter and combine these criteria in any way you like for purpose of analysis. This enables you to produce solid forecasts relating to project implementation.

Leading projects to success

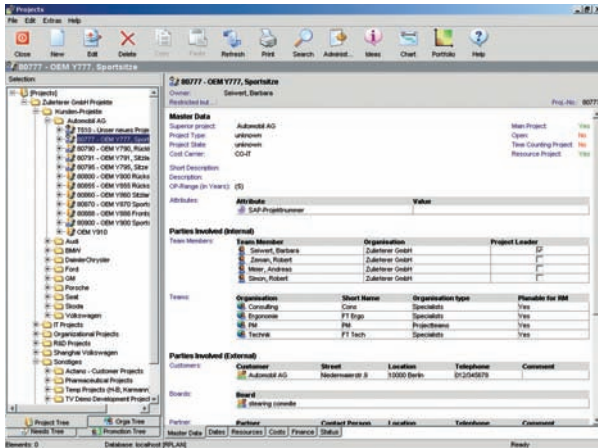

Because RPlan Portfolio Manager and RPlan Schedule Manager share the same database, you profit in two ways. Efficient, operative monitoring is backed by strategic and economic controlling to guarantee the success of your portfolio.

Naturally, any analysis options you have already created are retained for your further use. This approach ensures that tight budgets and scarce resources are invested in projects offering the greatest potential.

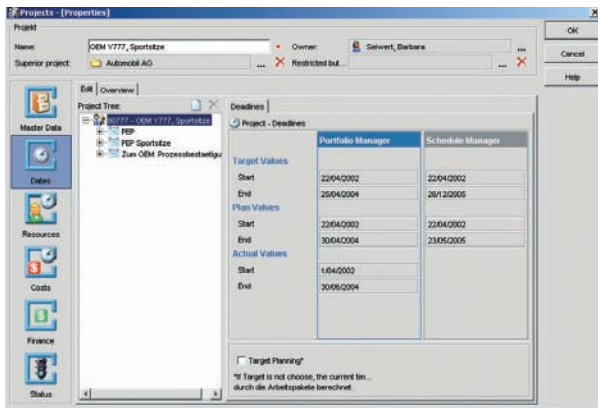

RPlan Portfoliomanager Highlights at a glance

- Key project information at a glance
